

TANF Emergency Fund

November 2, 2009

State Applications Approved as of October 27Elizabeth Lower-Basch and Josh Bone

Section 2101 of the American Recovery and Reinvestment Act of 2009 (ARRA) created a new TANF Emergency Fund, funded at \$5 billion. This federal fund provides states 80 percent of the funding for spending increases in certain categories of TANF-related expenditures in FYs 2009 or 2010 over FYs 2007 or 2008. Each state can receive no more than 50 percent of its annual block grant over the two-year period from the combination of the new Emergency Fund and the old Contingency Fund. Additional information about the Emergency Fund is available on the TANF Emergency Fund page on CLASP's website.ⁱ

In the most recent data available on the Department of Health and Human Services (HHS) website, as of October 27, 2009, 21 states have been awarded a total of \$828 million from the Emergency Fund. ⁱⁱ This figure represents a lower bound on state use of the Emergency Fund, as a number of other states have applications pending before HHS, and the states that have already received funds can apply for additional funds. For example, California has been approved for funding for increases in basic assistance and subsidized employment, but expects to submit an additional application for increases in subsidized employment. States may submit initial applications for funding from the Emergency Fund for federal fiscal years 2009 and 2010 at any point until September 1, 2010.

2

Table 1 shows each state's annual block grant allocation, the maximum amount each state could receive under the TANF Emergency Fund, the amount each state had received as of October 30, 2009, and the share of the allocation that each state had received. The amount each state has received from the Emergency Fund does not include any pending applications. Note that 18 states (marked with * below) received funding from the TANF Contingency Fund during FY 2009. Therefore, the amount that these states can actually receive from the Emergency Fund is less than the maximum shown in this table.

^{*} Received Contingency Funds in FY 2009, so not all of maximum allocation is available for Emergency Fund.

[•] Figure shown is sum of state maximums; however, only \$5 billion is available from Emergency Fund.

State Applications Approved as of October 27

November 2, 2009

4

A total of 18 states have received funding based on increased cash assistance caseloads and spending, 9 have received funding based on increased spending on subsidized employment, and 8 have received funding based on increased spending in short-term non-recurrent assistance.

The states that have received the largest amounts of funding to date are California and New York. The majority of California's award is for increased basic assistance, but the award also includes a significant increase in subsidized employment in the last quarter of FY 2009. New York's award is primarily for the Back to School Initiative, which provided one-time back to school payments to more than 800,000 children in low-income families in August 2009. The states that have received the largest shares (more than 25 percent) of their possible allocations are Maryland and Washington State. As both of these states also received the maximum 20 percent of block grant funding from the older Contingency Fund during FY 2009, they have been awarded about two-thirds of their overall limit.
