Organizational Prevention Capacity-Building Wheel

Structures
Physical components, such as by-laws, vision statements, written goals and objectives, and governance protocols needed to support structural capacity.

Processes
Clear guidelines and mechanisms for decision-making, resolving conflict, communications, orientation, and information dissemination to support prevention initiatives.

Willingness
Commitment and buy-in from individuals and organizations to support prevention work and increase their individual prevention knowledge, skills, motivation and resources.

Activities
Planning, implementation, and evaluation activities needed for primary prevention programs and strategies.

Resources
Knowledge, funding, labor, and technology needed to support primary prevention programs and strategies.

Capacity elements adapted from the CDC DELTA Program RFA 05039
Also referred to as the Tagliaferro-Rosas Wheel developed by the Delaware Coalition Against Domestic Violence DELTA Program
