

SAHELI ANNOUNCES:

Healthy Families

Please contact us if you are interested in learning more about the Asian culture.

Dynamics of Domestic Violence in Asian Communities

Domestic Violence and Sexual Assault occur in all communities, however, occur at disproportionately higher rates in the Asian immigrant community. This presentation discusses how to identify abuse in Asian communities, the cultural and structural barriers that prevent Asian victims from becoming safe, and resources and services available to Asian victims.

Cultural Considerations in the Asian American Community

This presentation covers key differences between Asian and American cultural values, norms, and expected behaviors. These differences have important implications for the Western service provider, who may not be familiar with the nuances of Asian cultures. By taking into consideration some common belief structures held by Asian cultures, non-profits can improve their interactions with the Asian community.
